Full story

Dell Technologies (NYSE: DVMT) announces its fiscal 2019 first quarter results. For the first quarter, revenue was \$21.4 billion, up 19 percent, and non-GAAP revenue was \$21.5 billion, up 17 percent from the prior period. During the quarter, the company generated a GAAP operating loss of \$153 million¹, with a non-GAAP operating income of \$2.0 billion, up 42 percent.

“We had a strong first quarter with balanced growth across all business units, regions, and customer segments,” said Tom Sweet, chief financial officer, Dell Technologies. “Our broad set of capabilities, enhanced by our targeted investments over the last year, drove strong top-line momentum and improved profitability, allowing us to generate good operating cash flow and make progress paying down our core debt².”

The company ended the quarter with a cash and investments balance of \$21.7 billion, an increase of \$1.4 billion from the prior quarter and an increase of \$6.7 billion from last year. Cash generation in the first quarter was seasonally strong given the overall velocity in the business. Subsequent to the end of the quarter, the company paid down another \$2.5 billion of core debt bringing the gross debt paid down to \$13 billion since the close of the EMC transaction.

Infrastructure Solutions Group revenue for the first quarter was \$8.7 billion, a 25 percent increase. This was driven by 41 percent year-over-year growth in servers and networking to \$4.6 billion and 10 percent growth in storage to \$4.1 billion. "Storage systems spending is forecasted to grow 9.8 percent year-over-year in the first quarter of 2018 and we expect, when IDC releases first quarter market share, Dell EMC's storage business will outperform the market and gain share," said Matt Eastwood, Senior Vice President of IDC's enterprise, datacenter, cloud infrastructure and developer research groups.
