1) Adjustments give effects of the Class V transaction, including the elimination of investment income related to the liquidation of VMware’s cash, cash equivalents, and investments in order to fund the special dividend and interest expense related to the debt financing as if they occurred on February 3, 2018, the first day of fiscal year 2019.

2) The incremental dilution from VMware attributable to Dell Technologies Inc. represents the impact of VMware Inc.’s dilutive securities on the diluted earnings per share of Dell Technologies and is calculated by multiplying the difference between VMware’s basic and diluted earnings per share by the number of shares of VMware Inc. common stock held by Dell Technologies.

3) Assumes static share count for each quarter in FY19. Calculated by adding 150 million shares primarily driven by the incremental Class C shares issued upon closing of the Class V transaction to the 567 million shares as of 3Q19 per slide 35.

4) Assumes static share count for each quarter in FY19 and potentially dilutive awards of 30 million. Also assumes average closing stock price of $49.65, the closing stock price of February 1, 2019.

1. Amounts are subject to change with no obligation to reconcile these estimates. Amounts may not visually foot due to underlying data.
2. No estimates are included for 3Q-4QFY24 guidance purposes on potential fair value adjustments on strategic investments given the potential volatility of either gains or losses on those equity investments.
3. Impact of purchase accounting and amortization of intangibles represents an estimate for acquisitions completed as of August 4, 2023 and does not include estimates for potential acquisitions, if any, during the remainder of FY24.
4. Consists of acquisition, integration, divestiture-related, and other costs. No estimate is included for 3Q-4QFY24 severance expense as it cannot be reasonably estimated at this time.
5. The aggregate adjustment for income taxes is the estimated combined income tax effect for the adjustments shown above as well as an adjustment for discrete tax items.
