Non-GAAP Financial Measures

This presentation includes certain financial measures not presented in accordance with generally accepted accounting principles ("GAAP") including, but not limited to, Non-GAAP Net Revenue, Non-GAAP Operating Income, Non-GAAP Net Income, Adjusted EBITDA, Free Cash Flow, Core Debt and Net Core Debt and certain ratios and other metrics derived therefrom. These non-GAAP financial measures are not measures of financial performance in accordance with GAAP and have important limitations as analytical tools and may exclude items that are significant in understanding and assessing Dell Technologies' financial results. Therefore, these measures should not be considered in isolation or as an alternative to net income, cash flows from operations or other measures of profitability, liquidity or performance under GAAP. However, Dell Technologies presents these non-GAAP measures because it considers them to be useful supplemental measures of performance for investors, analysts and rating agencies. You should be aware that Dell Technologies' presentation of these measures may not be comparable to similarly-titled measures used by other companies. See Appendix for reconciliations of Non-GAAP Net Revenue, Non-GAAP Operating Income, Non-GAAP Net Income, Adjusted EBITDA, Free Cash Flow, Core Debt and Net Core Debt to the most comparable GAAP metric.
